Advanced Search Screen

The Sojourner Truth Library Catalog Advanced Search Screen allows you to search for material owned by the Sojourner Truth Library using two search screens, and the connecting operators AND, OR, and NOT. You may also join search terms within a single search box using the operators “AND” or “OR”.

An All Fields search is a general keyword search. Terms are searched in all of the fields available for searching in the catalog, including the author, title, series title, subject headings fields. Other searchable fields include the author, title, subject headings, and imprint year (publication year) fields.

Search Hints

- Use the ? character to find matches that contain portions of words. For example, gun? will retrieve gun, guns, gunners, gunnery, gunning, etc. In another example, ?ology will retrieve anthropology, archaeology, psychology, etc. The ? character may also be used to find variant spellings. For example, alum?m will find both the American spelling, aluminum, and the British spelling, aluminium.

- When searching for exact titles, drop the initial article, i.e. The or A or An. For example, to search for Carson McCuller’s The Heart is a Lonely Hunter, select the title field and type: heart is a lonely hunter (Lower-case letters will find matches of capitalized words).
